

Angular/AWS Software Developer Job Description

Type: Permanent

Location: The Bridge Innovation Centre, Pembroke Dock. (Home working available)

Salary: Competitive & negotiable depending on experience.

Benefits: 25 days annual leave, home/flexible working, proper coffee.

About the role:

You love code. You want to build varied products. You want to help shape the future.

For you, it's not just about writing code. You want to know why you're doing it, who you're doing it for and see how you're being part of their journey. That's exactly how we feel and it's why we established Kew Consulting in 2017. Since then we've created and delivered numerous software projects to our clients across the UK and Europe.

We're looking for experienced front and back end developers with expertise in the following fields:

Front End	Back End
Angular <ul style="list-style-type: none">• HTML• Javascript• TypeScript• CSS• SCSS• LESS	Amazon Web Services (AWS) <ul style="list-style-type: none">• Lambda Functions (C# / Golang)• Cognito• DynamoDB• CloudFront• Route53• API Gateway• S3

You'll be working on web and software application projects, along with developing our own suite of tech products, as a valued member of our team. You'll also have problem-solving skills to crack whatever our clients throw at you.

You'll be given a flexible working environment. As a start-up, we need to be on hand to help our customers with whatever they need, but we're as agile in work as we are in development practices. This includes 25 days holiday plus bank holidays, a competitive salary, home-working and good coffee. If we really like you, we'll let you choose your own blend.

If you like the sound of what we've said so far, you have some professional development experience and want to work with a varied tech stack, then we want to hear from you. We have a long roadmap and you will be heavily involved in designing and developing major new functionality.

So how about a coffee (or a virtual one)? Send us an email with a bit about you and a CV. Better still, send some links to work you've done to careers@kewconsulting.co.uk and we'll be in touch.
